

Over the past month, the Washington County Drug Team, with the help of the Indiana State Police Meth Team has been busy cleaning up Washington County.

The two groups made 18 arrests and shutdown 14 meth labs.

“We took a lot of meth off the streets,” said Washington County Sheriff Claude Combs. “I am very pleased with the work of our drug team and the ISP’s meth team.”

Combs said all 14 of the labs that were shutdown were one-pot systems where the meth was being cooked in two-liter bottles.

“They usually use some type of plastic bottle and it takes a very short period of time to make it,” Combs said. “With it being that easy, a lot of people have jumped in the game recently. Our guys have been getting tips and we monitor the reporting services that tells you who buys Sudafed and stuff like that with all of those things working, the result is 18 arrests and 14 labs being shut down.”

Combs said the labs were sprinkled throughout the county. The first arrest was made January 17, 2012 and the last one was made Feb. 6, 2012.

Combs said meth is still a relatively new drug and the long-term affects are not known. That’s why he is always glad to get it off the streets when he can.

“Me, Mayor David Bower, former Salem chief Scott Ratts and current chief Troy Merry and the Prosecutor Dustin Houchin are committed to the drug team and the work they are doing,”

Combs said. “The drug team has made a significant different in drug trafficking in our county.”

The following is a list of people who were arrest during that period and their charges:

Lacey Jackson, Pekin, dealing (manufacture) meth; poss of precursor, poss of para, maintaining a common nuisance, neglect of a dependent x-2 (meth lab).
