?? The Washington County Growth Partnership announced that a conference will be held on September 30, in Loogootee, IN for anyone interested developing a recycling business in Southern Indiana.

The conference, hosted by the Indiana Department of Environment Management, is designed to promote and assist recycling in Indiana by focusing on economic development efforts targeted at businesses and projects involving recycling.

This is achieved by providing grant and loan opportunities to financially assist businesses in the creation and continuous development of recycling markets throughout Indiana.

The conference is open to any interested party but space is limited.

To reserve a spot or receive additional information on the conference, contact Laura Albertson at (812) 295-4142 no later than Friday, September 26.
